This course, jointly organized by the Department of Family Medicine and Primary Care (FMPC) and the Hong Kong Association for Integration of Chinese-Western Medicine (HKAIM), promotes interdisciplinary training and collaboration in primary care for common diseases in Hong Kong from the perspective of family doctors. Based on the "Hong Kong Primary Healthcare Blueprint 2022," the course focuses on breast cancer, menopause, colon cancer, chronic shoulder pain, respiratory diseases, and diabetes and its complications. It is taught by instructors from Traditional Chinese Medicine, Western Medicine, and Family Medicine. The target audience includes various primary care professionals, and the course enhances clinical thinking and interdisciplinary collaboration skills through scenario-based case studies and team simulations.
