Holistic Approach to Symptom Management in End-of-Life Care

Dr Chan Chung On

Specialist Doctor in Palliative Medicine
Hong Kong Society of Palliative Medicine

2026
20/8
Thursday

🕒 12nn - 1:15pm

The webinar will be conducted via

Abstract

End-of-life care beyond solely medical interventions is essential in addressing complex, inter-dimensional symptom distress and needs faced by dying patients and their caregivers. This professional training webinar introduces concepts of holistic approach to symptom assessment and management in palliative care setting, with case illustration focusing on managing common end-of-life symptoms, with integration of inter-disciplinary input in optimising care, comfort, and quality of life in End-of-life setting.

Target participants

Health care and social care professionals, priority will be given to those who:

- participated in JCECC Community Psychosocial End-of-Life Care Course; or
- are working with patients and family caregivers relating to end-of-life issues.

Language

The event will be conducted in Cantonese

活動將以廣東話進行
